

Plugged IN

This month, you are receiving a special, abbreviated edition of Plugged In. This issue is smaller because during the first week of September, you should have received an issue of Kentucky Living magazine detailing possible changes Congress is considering that could affect your electric service and rates. Please take a few minutes and read this important information. As always, if you have questions, contact a customer service representative.

Fall Into A Tasty Treat

Caramel Apple Fridays Are Coming!

Stop by JPEC Fridays in October for a tasty fall treat and free energy-efficient light bulbs.

JPEC Offers Levelized Billing

Hate surprises? Even if you like them, you probably don't want to see one on your next electric bill. Jackson Purchase Energy can help. JPEC now offers levelized billing. As opposed to budget billing, which used a 12-month average and charged customers the same amount each month, levelized billing will constantly adjust the monthly amount to better reflect actual use. This means there will be no catch up month at the end of the year, as was the case with budget billing.

The rolling-average adjustment means you can sign up anytime. New members are eligible with just two months of billing history.

For the convenience of JPEC's current budget billing customers, JPEC will change your account to levelized billing automatically. For more information, contact any customer service representative.

JPEC's Home Energy Expo

Oct. 18 • 10 a.m. • Paducah SportsPlex
